Chairman's Statement

BUSINESS REVIEW

Continuing the impressive performance in previous years, Xinyi Glass Holdings Limited (the “**Company**”) and its subsidiaries (collectively the “**Group**”) recorded substantial business growth during the six-month period ended 30 June 2007. The Group’s turnover and net profit reached approximately HK\$1,224.2 million and HK\$300.1 million, respectively, representing a period-to-period increase of approximately 74.5% and 114.3%, respectively, as compared to HK\$701.6 million and HK\$140.0 million for the six months ended 30 June 2006.

BUSINESS OUTLOOK

The Group’s third high quality float glass production line with a daily melting capacity of 500 tonnes commenced its trial operation in June 2007. A photovoltaic glass production line of a daily melting capacity of 300 tonnes and a high quality float glass production line of a daily melting capacity of 900 tonnes will be built in the second half of 2007.

The Group achieved impressive growth in the first half of 2007 with total turnover grew by approximately 74.5% to approximately HK\$1,224.2 million. This was primarily due to the substantial increase in the sales of the Group’s automobile glass products in both the PRC and overseas markets. The Group accelerated global marketing efforts for high quality automobile glass and strengthened our long-term partnership with selected automobile manufacturers and wholesalers in different countries. The Group continues to be the largest automobile glass and windshield exporter in the PRC, a position we have maintained since 2004.

In April 2007, the final results of “Sunset Review” of US Department of Commerce has revoked the PRC automotive replacement glass windshield antidumping duty order that no anti-dumping duty is imposed on the automotive windshields sold by the Group to customers in the US. This latest development strengthens the Group’s already leading position in North America market.

Our construction glass business also experienced significant improvement with operating result increased by 63.3% to approximately HK\$49.2 million for the six months ended 30 June 2007. This was a result of the Group's continuous efforts to improve the product quality, production efficiency and strengthen the production and selling the environmental - friendly and energy - saving low emission coated glass products. In accordance with the government policy in the PRC and the increasing market demands, all new buildings in the PRC are expected to use not less than 50% of its materials with environmental - friendly and energy - saving functions by 2010. The "urbanization" scheme adopted in the PRC also increases the market demand.

Our float glass business achieved an impressive results with the turnover of HK\$180.1 million. The Group's high quality float glass successfully gained recognition both in PRC and overseas markets. The increasing market demand accelerated the demand for our float glass products with high production efficiency. Running a vertical integrated of float glass production line with economies of scale, the Group has better control on production costs and the logistics which enable the Group to continue to deliver a constant supply of a variety of high quality float glass products.

In 2006, we had two high quality float glass lines (500 and 700 daily melting tonnes) commenced their productions. At the end of 2007, two additional new high quality float glass lines (500 and 900 daily melting tones) and one 300 daily melting tones photovoltaic glass production glass for renewal energy business will be built and completed.

Looking ahead, the Group's business objective is to continue to enhance the product quality, explore new products, improve the production efficiency and strengthen the cost control, in order to meet the increasing demand and expectations from our existing and future customers, thereby to increase the market share and the competitiveness of the Group. The Directors are optimistic to the enormous PRC environmental - friendly and energy - saving glass products market. The Group recently acquired three low emission glass coating machines (two for construction glass market and one for automobile glass, Solar-X, market) which will be delivered in late 2007 and commence production in first half of 2008. These newly acquired production facilities will increase the Group's production capacity of low emission coated glass to fulfill the increasing market demand and strengthen the Group's leading position in the environmental and energy-saving glass products market.

Chairman's Statement

On the other hand, there is a trend that traditional single glazing glass design will be gradually changed to double glazing insulated glass design in order to meet the new PRC environmental - friendly and energy - saving standards. This change is expected to be one of the future growth drivers for high quality float glass business. The Group's blue print for future expansion will aim to capture additional business opportunities arising from this new market trend.

LEE Yin Yee

Chairman

Hong Kong, 13 August 2007

OPERATIONAL REVIEW

TURNOVER

During the six months ended 30 June 2007, the growth in turnover was mainly attributable to the significant surge in automobile glass and float glass sales. Our major long-standing customers in North America continued to increase automobile glass aftermarket orders. North America continued to be our largest overseas market during the six-month period.

In addition, sales of float glass were also a major growth driver for the six month ended 30 June 2007 as a result of the strong demand in the PRC as well as overseas markets. Sales of float glass products commenced in June 2006 and as such, its contribution to the results of the Group for the six months ended 30 June 2006 only represented the one-month sales performance.

GROSS PROFIT

Cost of sales for the six months ended 30 June 2007 increased by approximately 63.7% which is commensurate with the increase in the turnover. Gross profit was approximately HK\$492.6 million for the six months ended 30 June 2007, representing an increase of approximately 93.4% as compared to the six months ended 30 June 2006. The overall gross profit margin increased from approximately 36.3% for the six months ended 30 June 2006 to approximately 40.2% for the six months ended 30 June 2007, which was primarily due to better cost control and increasing vertical integration in the production process, thereby improving the production efficiency with a better product mix, i.e. with additional sales on the high value-added low-emission coated glass, during the six months ended 30 June 2007.

OTHER REVENUE

Other revenue for the six months ended 30 June 2007 was approximately HK\$16.5 million, as compared to approximately HK\$9.1 million in the same period in 2006, with the increase principally attributable to the increase in government grants received in the PRC under the “tax refund on reinvestment” scheme. For the six months ended 30 June 2007, the Group received approximately HK\$14.1 million government grants, representing an increase of approximately HK\$6.9 million over the amount received during the same period in 2006.

EARNINGS BEFORE INTERESTS AND TAXES (“EBIT”) AND OPERATING PROFIT

EBIT increased by approximately 123.9% for the six months ended 30 June 2007 as compared with the same period in 2006. Such increase is consistent with the increase in the turnover and the net profit of the Group during the six months ended 30 June 2007.

TAXATION

Tax payment amounted to HK\$18.3 million for the six months ended 30 June 2007, with effective tax rate increased slightly from 4.9% to approximately 5.7% with a major subsidiary of the Company in the PRC entering into the “50% tax-exemption period” in 2007, as compared to the full tax-exemption year in 2006.

NET PROFIT FOR THE PERIOD

Net profit for the six months ended 30 June 2007 was approximately HK\$300.1 million, representing an increase of approximately 114.3% as compared with the same period in 2006. The net profit margin for the period increased significantly to approximately 24.5%, as compared to 20.0% in 2006, which was principally due to the increase in the gross profit margin and better control in the administrative costs.

CAPITAL EXPENDITURE

For the six months ended 30 June 2007, the Group incurred an aggregate amount of approximately HK\$497.4 million for purchase of plant and machinery, construction of additional factory premises and the float glass production lines at the Group's production complex in Dongguan, the PRC. The Group also implemented various renovations at its production complex in Shenzhen, the PRC.

NET CURRENT LIABILITIES

As at 30 June 2007, the Group had net current liabilities of approximately HK\$39.7 million which were primarily attributable to increase in short - term bank borrowings for the capital expenditure of the Group. The net current liabilities position of the Group is expected to be returned as net current assets position by a long-term syndicated loan obtained on 14 August 2007.

FINANCIAL RESOURCES AND LIQUIDITY

In 2007, the Group's primary source of funding included cash generated from operating activities and credit facilities provided by principal banks in Hong Kong and the PRC. As at 30 June 2007, the net cash inflow from operating activities amounted to approximately HK\$357.1 million (2006: HK\$128.1 million). As at 30 June 2007, the Group had balances of cash and cash equivalent of approximately HK\$112.9 million (2006: approximately HK\$131.5 million).

The total bank borrowings as at 30 June 2007 were approximately HK\$607.8 million. Net debt gearing ratio, as calculated by dividing net total bank borrowings by total shareholders' equity, increased to approximately 20.4%, as compared to approximately 9.6% in 2006, principally due to the increased bank borrowings to finance the Group's capital expenditure during the period.

TREASURY POLICIES AND EXPOSURE TO FLUCTUATIONS IN EXCHANGE RATES

The Group's transactions are mainly denominated in Renminbi, United States dollars and Hong Kong dollars with operations mainly in the PRC. As at 30 June 2007, its bank borrowings were denominated in Renminbi and Hong Kong dollars bearing interest rates ranging from 5.1% to 5.0% per annum. Hence, the Group's exposure to foreign exchange fluctuations was therefore minimal and did not experience any material difficulties and liquidity problems resulting from currency exchange fluctuation. The Group may utilize financial instruments for hedging purpose as and when required.

EMPLOYEES AND REMUNERATION POLICY

As at 30 June 2007, the Group had 6,215 full-time employees of whom 6,176 were based in Hong Kong and the PRC with 39 based in other countries. The Group strives to maintain good working relationship with its employees and to provide the employees with sufficient training on updated business knowledge including applications of the Group's products and skills on maintaining long-term relationship with customers. Remuneration packages offered to the Group's employees are competitive and consistent with the industry practice. Discretionary bonuses may be awarded to employees after assessment of performance of the Group and an individual employee.

The Group's subsidiaries in the PRC participate in the required contribution retirement schemes which are administered by relevant government authorities in the PRC. The Group's employees in Hong Kong are all covered by retirement schemes adopted in accordance with the mandatory provident fund requirements under the applicable laws and regulations.

The Company also adopted a share option scheme on 18 January 2005 for the purpose of providing incentives and rewards to eligible participants who have contributed to the success of the Group's operations. The Directors may, at their discretion, invite any employees and other selected participants as set out in the scheme, to accept options to be granted by the Group for subscription for the Shares. For the period up to the date of this interim report, 8,520,000 share options and 13,552,000 share options were granted under the share option scheme on 27 January 2006 and 1 July 2007, respectively, and 7,910,000 share options were outstanding as at 30 June 2007.
